WORK EXPERIENCE

Senior Site Reliability Engineer Honeywell

09/2020 - Present

Bengaluru

Honeywell is a **manufacturing and technology company** that operates in the aerospace, building technologies, performance materials, and technologies.

Achievements/Tasks

- Running the production environment, monitoring availability, and taking a holistic view of system health
- Improving reliability, quality, and time-to-market for products and services in the Forge Platform
- Measure and optimize system performance, with an eye on enhancing operational capabilities
- Identify Service Level Indicators (SLIs) that will align the team to meet the availability and latency objectives.
- Provide primary operational support and engineering for multiple large distributed software applications
- Build software and systems to manage platform infrastructure and applications
- Providing emergency response either by being on-call or by reacting to symptoms according to monitoring and escalation when needed
- Working on ideas and solutions within the infrastructure team to reduce the workload by automation.
- Planning and executing configuration change operations both at the application and the infrastructure level.
- Identifying parts of the system that do not scale, provides immediate palliative measures and drives long term resolution of these incidents.

SKILLS

CERTIFICATIONS

CKS: Certified Kubernetes Security Specialist (10/2021 - 10/2023)

CKAD: Certified Kubernetes Application Developer (02/2020 - 02/2023) ♂

CKA: Certified Kubernetes Administrator (03/2020 - 03/2023) ☑

TECHNICAL BLOGGING

Digital Ocean 🖸 "Faizan Bashir - DigitalOcean"

Hacker Noon

*Faizan Bashir – Hacker Noon**

EDUCATION

A Level (Post Graduate Diploma) NIELIT

2011 - 2013

Courses

- Programming
- System Design
- Java Applets
- Compiler Designing

Srinagar, J&K

- Networking
- Database Administration
- Graphics
- Object Oriented Programming

WORK EXPERIENCE

Cloud Architect

MintMesh Inc

11/2018 - Present Bengaluru

MintMesh is a leading provider of Micro Al Solutions for Professionals. Helping a Professional to get thru their work day better.

Achievements/Tasks

- Designed and built Mintmesh.ai and associated services infrastructure from scratch.
- Architecting the infrastructure in AWS Managed Kubernetes Service (EKS), managing deployment pipelines and writing Helm Charts.
- Leading the development team in managing and developing applications and databases in response to business needs.
- Responsible and accountable decision-maker around the implementation of technologies to achieve business objectives.
- Provisioning Infrastructure using the Hashicorp suite (Terraform, Packer), bash scripting and Weave EKSCTL.
- Creating a Continuous Delivery pipeline using AWS Amplify for VueJS frontend and hosting them on AWS Cloudfront CDN
- Reduced infrastructure costs by 20% with EC2 Spot Instances, reduced storage costs with S3 IA and EFS IA Storage Class using Object Lifecycle Policies.
- Intelligent routing of traffic in the system using Service Mesh Istio, Ingress routing using Traefik and Nginx ingress.
- Monitoring and Alerting the state of the infrastructure and applications using Prometheus, Grafana, and Kiali.

Senior Software Engineer Softway

08/2017 - 10/2018

Bengaluru

Achievements/Tasks

- Introduced and implemented microservice architecture with Laravel/Lumen Framework.
- Containerized the legacy zend and laravel/lumen applications. Set up the local development environment with Docker Compose.
- Developed APIS to access Google Cloud Storage for legacy PHP 5.3 Zend application.
- Wrote scripts to automate the updating of Google Cloud Load Balancer (GCLB) with the new URLS.

Senior Software Engineer

Ezytruk Solutions Pvt Ltd

Bengaluru

11/2016 - 08/2017 Achievements/Tasks

 Understanding client requirements & functional specifications. Managing, maintaining, developing, & deploying applications & databases.

EDUCATION

High School

Tyndale Biscoe School

1993 - 2005

Courses

Outdoor Activities

Personality development

DEVOPS EXPERIENCE

Infrastructure as Code (IaC)

MintMesh Inc

Bengaluru

Srinagar, J&K

11/2018 - Present Tasks/Achievements

- Provisioned AWS Infrastructure VPC, EC2, EFS, ECR, S3 EKS, EBS using Packer, Terraform and shell scripts
- Provisioned AWS EKS with Worker Node Groups, ASG, EC2 spot instances using EKSCTL

Container Orchestration

MintMesh Inc.

12/2018 - Present Tasks/Achievements

- Containerized whole MintMesh architecture using Docker Swarm and now migrated to Kubernetes
- Wrote Helm charts for all of the services.
- Implemented stable Helm charts for Redis, NGINX-Ingress, metric-server, reloader, efs-provisioner.
- Extending Kubernetes functionality using CRD's.

Distributing Tracing, Monitoring and Ingress MintMesh inc

11/2019 - Present

Tasks/Achievements

- Distributed Tracing using Jaeger
- Implemented Service Mesh Istio with Monitoring and Alerting using Prometheus, Grafana and AlertManager
- Implemented multiple Ingress controllers: Traefik, Nginx

ELK Stack

MintMesh Inc

05/2019 - Present

Tasks/Achievements

 Implemented Elastic Stack for logging with file beats in Docker Swarm

DEVELOPMENT PROJECTS

Mintmesh - MintMesh.AI (08/2019 - 09/2020) 🛂

 Managing deployment of Home page for MintMesh using AWS Amplify with Continuous Deployment, Cloud Front (CDN)

MintMesh - Recruiter Frontend (08/2019 - 09/2020)

 Managing deployment of Recruiter Vue.is Application using AWS Amplify with continuous deployment, Cloud Front (CDN)

MintMesh - Recruiter API (08/2019 - 09/2020)

- Developed Recruiter APIs using Express. Js Framewok.
- Technologies used: Node Js, Mongoose ORM, RabbitMO, Redis, JWT, AWS S3.

WORK EXPERIENCE

Software Engineer

Insights Marketing & Communication Dubai

02/2016 - 09/2016

Srinagar, J&K

Achievements/Tasks

Full Stack Developer

Software Engineer Denesof IT Services

01/2014 - 02/2016

Srinagar, J&K

Achievements/Tasks

Full Stack Developer

DEVELOPMENT PROJECTS

MintMesh - Training App (02/2019 - 09/2020)

- Developed Training Application using Express.JS Framework
- Technologies used: Node Js, RabbitMQ, Mongoose ORM, AWS S3

Softway - eSigns (08/2017 - 10/2018) 🗗

- Redeveloped eSigns, a US eCommerce website
- Technologies used: Google Cloud Provider, Laravel, ExpressJS, NodeJS, PHP, Mysql, Memcached, JavaScript, Jquery, Redis, Docker, Docker Compose, Vue.js
